PROFESSIONAL SUMMARY

Motivated Software Engineering graduate with hands-on experience in Python, React.js, Flask, JavaScript, and SQL. Skilled in software development, REST API integration, debugging, responsive web application development, and Machine Learning solutions. Experienced in collaborating on academic and industry-oriented projects while following Software Development Life Cycle (SDLC) practices. Seeking an entry-level Software Engineer role to build scalable and high-quality software solutions.

TECHNICAL SKILLS

Languages	: Python, JavaScript, SQL
Frontend	: React.js, HTML5, CSS3, Tailwind CSS
Backend	: Flask
Database	: MySQL
Tools	: Git, GitHub, VS Code, Jupyter Notebook
Libraries	: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow
Concepts	: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), REST APIs, Responsive Web Design

PROJECTS

Natural Language Processing for Web Text Classification Using Deep Learning (Major Project)

- Developed an advanced Natural Language Processing (NLP) application for web text classification using a hybrid deep learning architecture combining **BERT, BiGRU, CNN, and Attention mechanisms**.
- Implemented text preprocessing techniques including tokenization, stop-word removal, and contextual word embeddings to improve classification accuracy.
- Designed, tested, debugged, and integrated a Flask-based web application for real-time text classification.

Technologies: Python | TensorFlow | BERT | BiGRU | CNN | Flask | HTML | CSS | JavaScript | NLP

Climate Change Impact on Agricultural Land Suitability Prediction (Minor Project)

- Developed a full-stack web application using **Python, Flask, and Machine Learning** to predict agricultural land suitability based on climate and environmental factors
- Implemented a **Gradient Boosting** model trained on climate datasets to generate accurate land suitability predictions.

Technologies: Python | Flask | Scikit-learn | Pandas | HTML | CSS | JavaScript | Gradient Boosting

Photography Portfolio Website

- Developed a fully responsive photography portfolio website using React.js, Next.js, HTML, CSS, JavaScript, and Tailwind CSS.
- Developed responsive UI components and integrated frontend modules with backend APIs.
- Optimized website performance and responsive layouts for desktop and mobile devices.

Technologies: React.js, Next.js, HTML5, CSS3, JavaScript, Tailwind CSS

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering (Data Science)

Samskruti College of Engineering and Technology, JNTU Hyderabad

Nov 2022 – May 2026

CGPA: 7.8/10

INTERNSHIPS / TRAINING

Machine Learning Trainee | Corizo

- Successfully completed higher training in Machine Learning.
- Developed 4+ real-world Machine Learning and Web Development projects using Python, Flask, React.js, and Scikit-learn.
- Solved real-world Machine Learning problems by developing predictive models using Python and Scikit-learn.

Emerging Technologies Trainee | Code Unnati (SAP + Edunet)

- Completed a 6-month Advanced Training Program on Emerging Technologies.
- Developed AI, Machine Learning, and IoT projects using Python and SAP BTP under industry mentorship.
- Developed real-world AI and Machine Learning projects under industry mentorship.

CERTIFICATIONS

- Advanced Course on Emerging Technologies – Code Unnati
- Machine Learning – Corizo
- Java Programming – GUVI
- Full Stack Web Development – Mind Luster

LANGUAGES

- English
- Telugu
